14.15 – 14.45	**PRESENTATION SKILLS IN PRACTICE** Mr Ross Fisher Consultant Paediatric Surgeon, Sheffield Children's NHS Foundation Trust
15.00 – 15.30	**LISTEN UP - A POEM** Laura Mucha & Dr Najette Ayadi O'Donnell
15.30 – 15.45	**CLOSING REMARKS** Organising Committee: Dr Andrew Chapman, Dr Harsita Patel & Dr Susan Wallace
15.45 – CLOSE	**FINISH (VIRTUAL PUB)**

MDU

PLENARY INFORMATION

INFORMATION

The morning will feature a series of talks from experts, around the themes of Innovation, Involvement and Inspiration and will be available to all delegates.
Posters will be presented electronically and be available to view in the breaks - the three best abstracts will also feature in oral presentations in the morning session.

PROGRAMME

AN INTRODUCTION TO MACHINE LEARNING AND ITS POTENTIAL TO IMPROVE PATIENT OUTCOMES IN HEALTHCARE.

Dr Chris Kelly
Paediatric Doctor & Clinician Scientist at DeepMind Health Research Team

Chris is a senior research scientist at Google Health in London, working on artificial intelligence research in medical imaging. As a paediatric trainee, Chris undertook an ACF and PhD funded by a BHF fellowship at St Thomas' and King's College London exploring abnormal brain development in infants born with congenital heart disease. Alongside clinical practice, Chris founded two technology startups that were both later acquired, and created a smartphone app called NeoMate, used widely by doctors and nurses in neonatal emergency situations.

PEM ADVENTURES

Dr Dani Hall
Consultant in Paediatric Emergency Medicine, Evelina London & Children's Health Ireland
Dr Sarah Davies
Paediatric Emergency Medicine GRID Trainee, Chelsea and Westminster Hospital

Description of Session
Today you will be managing children in the children's Emergency Department. Use technology and a bit of quizardry to choose your own PEM adventure by directing investigations and management of some evidence-based and practice-challenging cases (with an inbuilt time-travel machine if the outcome isn't quite what you're hoping for...) **#PEMadventures**

Dr Hall is a PEM consultant with a love of education, organising and delivering PEM education at local and national levels. She is passionate about advocating for children and young children and proud to have introduced the HSE Rainbow Badge to Children's Health Ireland. She loves good coffee, a good story and her family.

Dr Davies is a PEM GRID trainee with interests in medical education and integrated child health care. Sarah is passionate about using simulation to improve training for paediatricians in acute mental health presentations and at raising the mental health agenda within Paediatrics. Outside of work, she enjoys spending time with her two young children, spotting diggers, dinosaurs and dancing around South London!

PLENARY INFORMATION

PEDX

Dr Nick Prince
Consultant Paediatric Intensivist, St George's Hospital

Introduction to a new style of teaching. Short, sharp and punchy - teaching doesn't have to be wordy. Dr Nick Prince shares a fantastic new style of delivering departmental teaching, showcasing some spectacular talks from the last few years at St George's Hospital.

Intro - Dr Nick Prince
How to Talk to Anti-Vaxxers - Rosie Roots
PID: When Can My Child Go Back to School - Simon Drysdale
Everyday Racism - Kunal Babla
Identifying Signs of Child Abuse in Childhood Drawings - Oisin Dadswell
Speech & Language: Silent Aspiration - Ashley Dean
Sex Ed for Paediatricians - Emma Sunderland

ABSTRACTS IN ACTION

Three oral presentations from the best abstract submissions to the conference - as selected marker by London TPDs

PRESENTATION SKILLS IN PRACTICE

Mr Ross Fisher
Consultant Paediatric Surgeon, Sheffield Childrens' Hospital

Presentations suck. You know that, everybody knows that but nobody does anything about it. This workshop will change your presentations and your life. Seriously.

Ross Fisher is a Consultant Paediatric Surgeon in Sheffield Children's Hospital. That means nothing about presentations though. He is Honorary Professor in College of Surgeons and Physicians of Canada because of his work on presentation skills. He runs a website dedicated to presentation skills. He gets invited all round the world to share ideas on presentation skills. Come and see what the hype is about.

WORKSHOP INFORMATION

DRAWING ON OUR FEELINGS

Dr Heidi Edmundson
Consultant Emergency Physician & Wellbeing Specialist
Whittington Hospital

Heidi Edmundson has worked in the NHS for over 20yrs and for the last 10 has been a consultant in Emergency Medicine. She is a passionate advocate for NHS staff wellness and its importance with regards to the individual, the workforce and the patients they care for. She believes in the power of using fun and creativity as means to facilitate wellness, build teams and give people a voice. She has introduced sessions dedicated to 'fun and creativity' to her workplace in which staff are encouraged to play games or take part in creative tasks. The games are influenced by the methodology found in Forum Theatre. This is a style of theatre created by the Brazilian Augustus Boal, originally, developed to explore oppression, insoluble problems and drive social change. She believes that by engaging in fun and creative tasks people are able to express their whole selves. Seeing and appreciating this allows us to connect to the humanity in ourselves and others. This session will explore how drawing works as a medium to express emotion. Includes a short film relating to this process during the COVID pandemic.

'LISTEN UP'

Laura Mucha
Poet, author and children's advocate

Dr Najette Ayadi O'Donnell
ST7 *Paediatric Trainee - Kings College Hospital*

Award winning poet Laura Mucha and Dr Najette Ayadi O'Donnell discuss what happens when paediatricians around the country come together and co-write a children's poem. 'Listen up!' demonstrates the power of poetry in advocating for the voice of the child, the use of the arts in reflection and what can happen when you give people the space to process. Plus a showing of the film 'Listen up!'.

CLOSING REMARKS

Dr Andrew Chapman, Dr Harsita Patel & Dr Susan Wallace
Conference Organising Committee
