Join your colleagues and follow in the footsteps of 150 London School of Paediatric trainees who've taken their own QI journey and become LSP Change Champions and role models.

We know that paediatric trainees need to build skills to improve services. Choose a structured way to learn, practice and evidence quality improvement and deliver benefits to patients that can live on when you've moved on. Benefit from experienced coaches, mentors and faculty who've stood in your shoes.

Explore, design, test and implement meaningful improvements in 18 weeks. Completion of this programme evidences QI Level 1 and 2 in the RCPCH Progress Curriculum. Open to paediatric trainees, consultants, qualified nurses, pharmacists, allied healthcare professionals and parents.

"Our team's QI posters have just won 2 prizes at the Bristol Patient Safety Conference. We also had oral presentations and posters at the RCPCH conference.

Thanks SO much for your mentorship - the Improve ONE thing: Paediatrics course, my experience and the tools you imparted have changed my thinking and approach and enabled me to achieve so much."
